

# Learning Habits in Computing

## Ready

- Be effective in your understanding of the school ICT security systems – **remember your password!**
- Be organised with your **file management**, including saving work in the correct place with a sensible name.

## Respectful

- Be respectful of other ICT users and the computer equipment you are using.
- Be **respectful, considerate** and **listen** to others during class discussions and question and answer sessions –this is very important as you progress to college and the world of work.

## Responsible

- Be **independent** in your use of our online platforms and the many resources put on it for your learning.
- Take pride in the **presentation** of your work, whether it's work completed on the computer or written in your book.

## Aim High

- Develop your **revision skills** and ensure you use them to effectively prepare for topic tests and exams.
- Extend your **coding skills** by developing them in your own time.
